Profile

A web developer with experience who is skilled in all phases of sophisticated web development. competent in testing, debugging, and user interface procedures. brings knowledge of the design, setup, testing, and management of web systems. Especially in the area of front-end web development, the developer has a great deal of expertise in creating websites that are both aesthetically pleasing and user-friendly. possessing a promising range of skills. I am able to efficiently manage myself during solitary initiatives and work with others in a team environment.

Employment History

Web Developer, Contract, Remote

July 2020 – Present

Because the majority of my clients are students, most of my works are contractual in nature, so they are not typically hosted on the internet. When asked about my work, the majority of them said that it was the best because it was effective, attractive, friendly, and almost always helped them achieve their goals.

Web Developer, Truelancer, Freelance

October 2021 – Present

One of the largest international freelance marketplaces is Truelancer. I tried working there and received satisfactory results, but at this point, I have given up and am using a domestic system instead because of the payment system. Even though it pays better in accordance with the PayPal payment system, I was compelled to stop and leave the freelance path. as long as the system was not changed and corrected.

Education

Preparatory, Saint Daniel Comboni Catholic Secondary and Preparatory School, Hawassa

September 2019 – Present

I started my studies in grade 9 at Saint Daniel Comboni Catholic Secondary and Preparatory Institution in 2019, based on the Ethiopian educational system. I will finish my studies there and graduate in 2023 after passing the National Entrance Exam. I have received help from this fourth-level educational institution in my quest to learn more about software development.

Hobbies

Coding, Hiking, Bicycle
Riding, Basketball,
Video-games
